Project Design Phase-I
Solution Architecture

Project title: Estimate the crop yield using Data analytics
Mentor Name: Sowmia K R
Industry Mentor Name: Srikanth, Mohammed Azhar Uddin
TeamID: PNT2022TMID02564
Team Members:

1. **Anuraagavi MR(TeamLeader)**
2. **Aditya Venkatesh**
3. **Haripriya k**
4. **Harinivas M**

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.

- Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, managed, and delivered.
